Sheboss-Admin is a MERN Admin Dashboard used to control sales and inventory made on the client side of Sheboss(an e-commerce app)
Technologies: React, JavaScript, MaterialUI, SASS, Node.js, Express

BetaCrypto

A Cryptocurrency and forex exchange website. It uses a free API to fetch all the cryptocurrency coins with live real time prices.
Technologies: React, JavaScript, MaterialUI, CS, Context API

EXPERIENCE

Junior Software Developer

A23 Labs | 03/2021 - Present

- Consult with clients regularly regarding projects, proposals, and technical issues that arise during the development process.
- Modify existing software to detect and correct errors, improve performance, and upgrade interfaces.
- Lead version control efforts for A23 Labs, employing GitHub and other public and open source repositories.

Accomplishments:

- Created a mobile-ready expense tracking software for clients as well as the creation of a new document management system using Node.js, JavaScript, React, SASS and HTML5.
- I have also been instrumental in building and implementing an automated bug tracking system that would spot issues in the development process, ultimately resulting in a 28 percent reduction in issues reported in the later stages of development.
